

ARISTON
The home of sustainable comfort

Solar Water Heating Systems and Cylinders

WATER HEATERS ■ SOLAR SYSTEMS ■ HEAT PUMPS ■ GAS BOILERS

The home of sustainable comfort

As a **leading specialist** in heating and water-heating with over 90 years of history, Ariston understands well the challenges in creating practical and high-performance products and systems that guarantee exceptional levels of comfort and efficiency. That is why it has set itself a new mission – **to give more homes access to sustainable comfort solutions** using less energy and effort.

To this end, it has further strengthened its commitment to delivering **high-quality, renewable and energy-efficient solutions** that can simplify and improve the quality of home life while empowering people to live more sustainably.

By successfully combining its global reach with an in-depth focus on the needs of the different markets where it has a presence, Ariston prides itself in being the home of sustainable comfort: a reference brand trusted worldwide by millions of families and industry professionals longing for advanced thermal comfort solutions that **not only are easy to use and maintain but also use as little energy as possible**.

Our story, driven by your needs

Ariston's continuous growth has been fueled by its commitment to provide people with reliable and highly-efficient comfort solutions to improve and enjoy life at home.

Each step of the way we have been driven by the existing and emerging needs of our customers, and our solutions have been conceived with their lifestyle in mind.

'30s

Foundation

Aristide Merloni founds "Industrie Merloni" company in the Marche Region of Italy, and starts the production of weighing scales.

'80s

Heating

We consolidate our market leadership in water heating and the production of boilers begins.

'60s

Water heating

The Ariston brand is launched and the production of electric water heaters begins.

'90s

Global expansion

With the launch in China and Russia, we begin to evolve into a global brand.

'10s

Ariston Comfort Challenge

With this mission, Ariston proved the ability of its products to guarantee exceptional performance, durability and efficiency's levels in every condition, even where it seems impossible. It was a huge challenge, but it was just the beginning.

'00s

Renewable technologies

We successfully develop and launch our new model in heat pump, which marks our development into innovative and sustainable heating technology.

'20s

The home of sustainable comfort

We strengthen our commitment to providing our end-users with products that generate heating and hot water in the most efficient and renewable way possible. A tangible sign of our dedication to respecting everything that surrounds us.

Believe in sustainability

Our purpose is to provide **everyone, in every corner of the world, with high-quality heating and water heating solutions, while protecting the environment.**

To this end, we have placed energy efficiency and technologies using energy from renewable sources at the centre of our sustainable growth strategy, thus acting consistently with the sustainable

development goals endorsed by the General Assembly of the United Nations.

This commitment is reflected in the effort we invest in developing efficient and sustainable products, solutions and processes that can make a decisive contribution to reducing energy consumption and environmental impact without sacrificing comfort.

SUSTAINABLE DEVELOPMENT GOALS

The economic, social and environmental impacts generated through Ariston Thermo Group's operations contribute towards 9 of the 17 sustainable development goals, including:

Sustainable cities and communities

Ariston Thermo Group's commitment to energy-efficient solutions will enable citizens to use clean energy to its fullest potential. Replacing low-efficiency products with Ariston's new high-efficiency technologies will allow to curb carbon dioxide emissions by more than 3,4 Mln tons by 2022*.

Responsible consumption and production

All of our production plants around the world are at the centre of Ariston Thermo Group's energy efficiency plan. This consists in a long-term strategy that in 2019 allowed the Group to achieve a remarkable result: over 10,000 tons of CO₂ equivalent avoided thanks to the energy efficiency of the production processes.

Climate action

During 2019 the Ariston Comfort Zone, a modular house equipped with Ariston's most advanced and efficient technology, enabled a group of researchers from the University of Copenhagen tasked with studying how climate change is affecting the Arctic ecosystem to conduct 22 new studies.

Pre-Sales and After-Sales technical support

Our Services

We are always at your side In all phases of the realization of a project.

From the design of a plant, to the construction of the system itself and even after commissioning, a team of Ariston specialists is constantly available to provide support and assistance.

Pre-Sales

A team of technicians and engineers offer their support and their experience in the design of key-on-hand solutions, providing them with products, designs and maintenance services.

Technical Consultancy Center

The Technical Consultancy Center provides every day specialist consultancy and timely responses on the technical characteristics of installations.

The technical team is the right interlocutor with whom interface for design and maintenance of complex plants.

After-Sales

Our qualified Service Network provides technical support for startup, maintenance, troubleshooting and repair interventions, by remote and on field as well.

Our mission is to deliver high level of service, through solid know-how and quality of genuine spare parts, in order to ensure the Ariston products performance, long term reliability and make them exceed the Customer expectations.

ARISTON CARES!

Energy efficiency is becoming a more and more common word when talking about domestic hot water production and delivery. The growing concern for the future of the environment we are living in, and the desire to leave a green and healthy world to future generations is creating a shift in the demand from traditional technology towards high-efficiency and renewable products.

Modern technologies like solar systems and air to water heat pumps perfectly serve the scope.

They use a clean and renewable source, either sun or air, to heat the water thus giving you maximum comfort while reducing polluting emissions and protecting the environment.

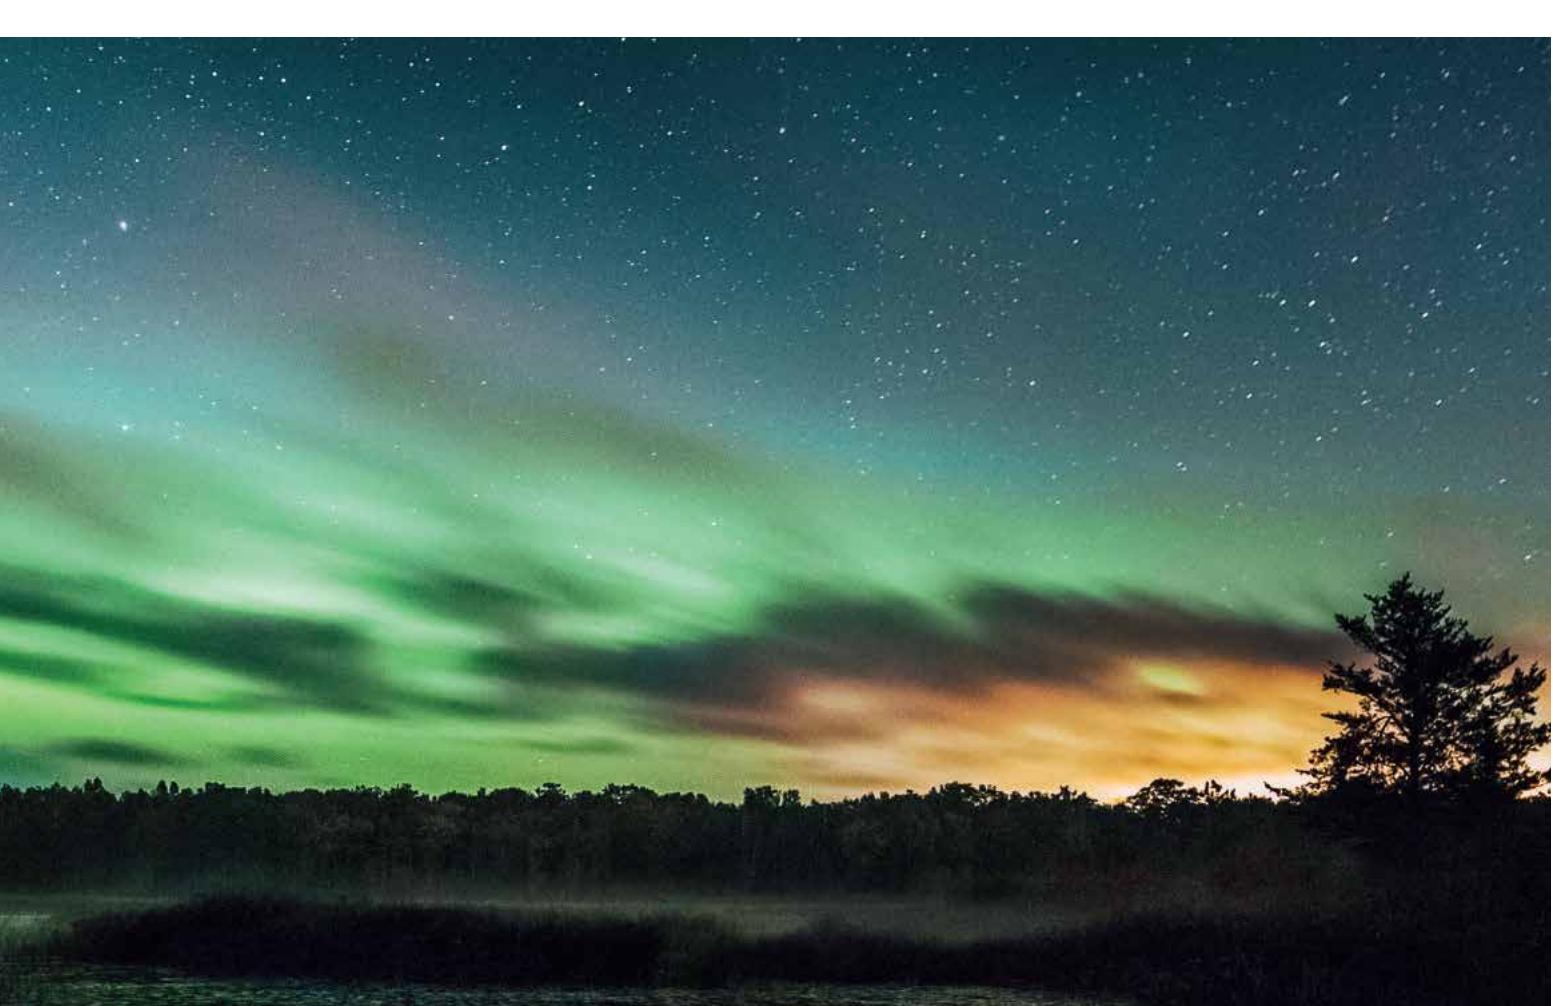

Ariston Thermo Group, a leading brand in thermal comfort, has been proposing alternative energy-efficient solutions worldwide since many years.

With its wide range of solar systems (both natural and forced circulation) and air-to-water heat pumps (both monoblock and split versions) is capable of offering in every situation the right solution to give its end-user hot water with an environmentally friendly attitude.

Ariston Thermo Group has committed itself to a long-term challenge: reach 80% of its sold products only on high-energy efficiency and renewable products by 2020 in order to bring a tangible change in the world we are living in.

DO YOU WANT TO TAKE PART TO THIS CHANGE?

ARISTON QUALITY: SIMPLY “MADE IN ITALY”

INTERNATIONAL QUALITY CERTIFICATION

All Ariston factories are certified by CSQ, a member of the International Certification Network IQNet. As a result, all Ariston products are manufactured in compliance with the highest standards, guaranteeing reliability and high-quality.

Every year all the plants are involved in a competition aimed to improve the quality level of the production.

3 MILESTONES OF QUALITY

Customer satisfaction is Ariston's main concern and this is why quality is constantly monitored at every level through:

- **Incoming control** of the raw materials and components
- **Process Control** aiming to intercept the potential defects in earlier stages of the manufacturing process
- **Product Testing** of 100% of the production in the line to assure the correct functioning of the product

ITALIAN TECHNOLOGY & DESIGN

Driven by innovation but still linked to its roots.

This is the perfect mix that represent Ariston attitude and that pushes the members of the R&D department to develop more efficient, eco-friendly and reliable products always with the quality and design typical of the Italian manufacturing tradition.

ARISTON SOLAR SYSTEMS: 30 YEARS OF EXPERIENCE AT YOUR SERVICE

WHEN YOU INSTALL AN ARISTON SOLAR SYSTEM AT YOUR HOME, YOU ARE NOT SIMPLY INSTALLING A PRODUCT; YOU ARE BRINGING AT YOUR HOME 30 YEARS OF EXPERIENCE, SYSTEM DESIGN, PRODUCTS TEST AND EVOLUTION.

1982

Ariston opens the first plant for the production of solar collectors to contrast rising price of oil in Europe, that at that time was incentivizing green technologies.

In the first year the record production of 44.000 m² was reached.

Ariston Thermo immediately became a leader in this sector.

The production was meant just for Italy at that time and we kept manufacturing collectors in Cerreto (Italy) till 2001.

1983

The first Ariston solar collector is officially certified by ENEL, national authority of energy in Italy.

Ariston solar collectors are used to realize one full wall of a skyscraper in Milan.

2002

Acquisition of Elco company, leader in north west Europe in heating and with a long tradition in solar systems. All the products in the actual range are tested separately by Ariston (Italy) and Elco (Germany) to ensure covering all possible working conditions.

2004

Opening of a new solar plant in India for Indian Market only.

Starting the production of vacuum tube in China. Tubes and manifold technology are patented by Ariston.

2007

Serra De' Conti plant (Italy) was opened and became the center of the R&D dept for all the plants. Serra De' Conti is one of the most technologically advanced plant in Europe.

2012

"Sun&wind Energy" magazine, places Ariston as first manufacturer of solar collectors in Italy

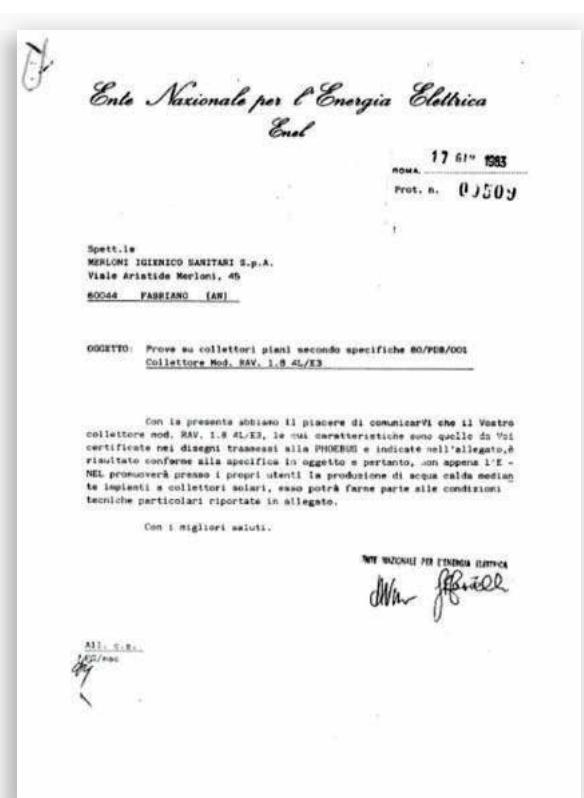

“

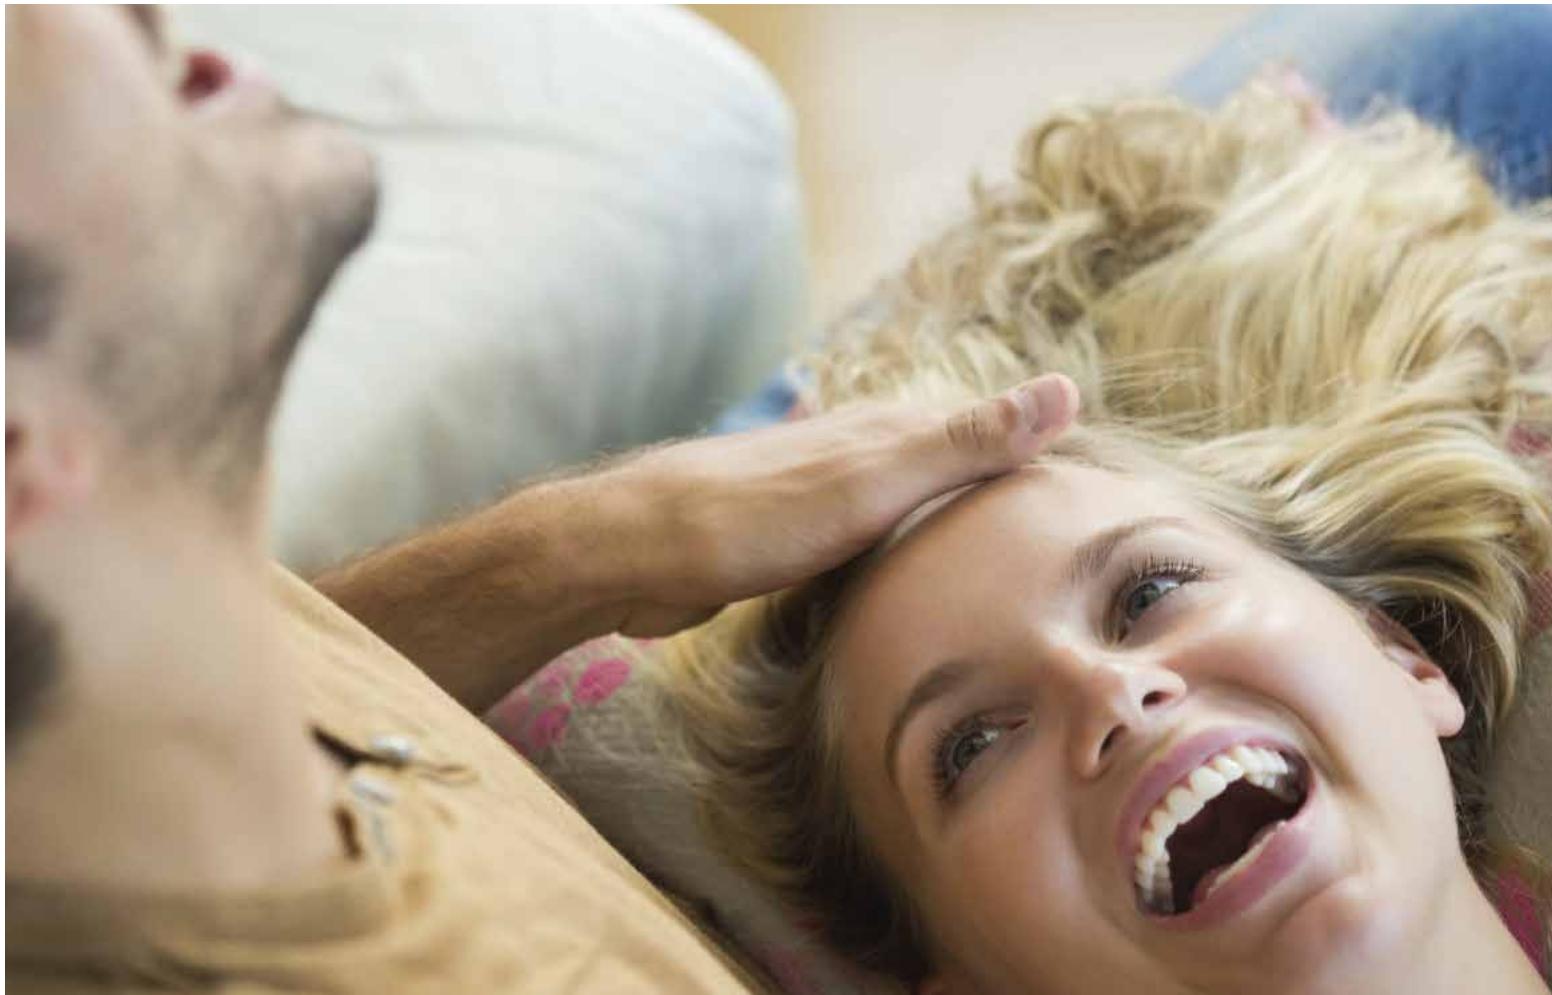

OBJECT:
test on flat collectors according to 80/PDB/001
specification.
Collector model RAV 1,8 4L/E3

With the following letter we are pleased to inform you that your collector model RAV 1.8 4L/E3, whose characteristics are those certified in the technical drawing sent to PHOEBUS and shown in the attached, are compliant to the 80/PDB/001 requirements and therefore, as soon as ENEL will promote solar water heaters to its end-users, your collector can be part of the offer as per the conditions agreed.

”

OUR FIRST SOLAR COLLECTOR
WAS CERTIFIED IN 1983 BY
THE ITALIAN NATIONAL BODY
OF ENERGY.

ARISTON SOLAR THERMAL: QUALITY GUARANTEED

CERTIFIED ENERGY EFFICIENCY

The Ariston collectors have maximum efficiency levels and respond to the EN 12975 Standard. All of this has been checked by strict tests performed at accredited research centres. The new products have acquired the Solar Keymark.

Ariston also distinguishes itself for the attention reserved for its customers in the after-sales period.

The five year warranty covers the collector and the cylinder, while the electronic control unit, the pump unit and the accessory kits are guaranteed for two years.

LONGER LASTING AND SAFER

The special highly transparent toughened glass of the Ariston collectors reflects the incident solar rays to a minimum, thus loosing little energy. The solar energy absorbed is also withheld thanks to its prismatic surface, which creates a "greenhouse effect" inside the collector. The maximum efficiency is accompanied by the safety of toughened glass, tested against hail.

ANTI-REFLECTIVE AND HAIL-PROOF

TYPE OF SOLAR SYSTEM

As for heat systems, the heat is transferred by means of a “heat carrying fluid” that runs between the solar panel and the cylinder.

The fluid can run spontaneously or using a pump. On the basis of which the two types of solar systems are distinguished: natural or forced circulation.

Kairos Fast

Forced circulation solar system with integrated single/double coil tank for the production of domestic hot water

PERFORMANCES

- / The selective aluminium absorber forgives very high efficiency, and reduced reflection;
- / The ultrasonic welding technology, on the collector, ensures very good performances for home applications;

DESIGN AND TECHNOLOGY

- / The Sensys, the system interface included in the product, allows an easy navigation and a full control of all the working parameters, displaying the solar fraction, the storage of how water and the energy saving;
- / The preassembled storage offers the best enjoyable design of its category, thanks to the accurate study of the lines, and of the external shape;

QUALITY

- / The collector's solar key mark certifies the compliance with the international standard;
- / The protech anode guarantees anti-corrosion protection of the internal tank;

Single/double coil pre-assembled tank module for the production of domestic hot water

- / The storage's polyurethane insulation free of CFC & HCFC allows maximum protection against heat losses;
- / The storage can disperse up to 1,5 kWh/24 h (150 lt): one of the lowest value of its category;
- / The arrangement for an additional expansion vessel makes the product suitable for big solar systems;
- / The accurate design of the heat exchange surface can provide a big amount of hot water;
- / The motorized mixing valve gives you the possibility to set the desired temperature;
- / The preassembled storage offers the best enjoyable design of its category, thanks to the accurate study of the lines, and of the external shape;
- / The air purge valve protects from air accumulation;
- / The preassembled hydraulic safety group protects the storage from high pressure working conditions;

Kairos Combi

Integrated tank for the solar heating integration and for the production of domestic hot water

- / The soft 100 mm insulation allows maximum protection against heat losses;
- / The high residual head (6,5 m) of the pump group assures the proper working of big systems;
- / Kairos Combi includes all the accessories needed for a complete installation: the digit pump group, the digital manometer, the digital flow meter...
- / The Sensys, the system interface included in the product, allows an easy navigation and a full control of all the working parameters, displaying the solar fraction, the storage of how water and the energy saving;
- / The air purge valve protects from air accumulation inside the system;
- / The preassembled hydraulic safety group protects the storage from high pressure working conditions;

Kairos XP 2.5-1V

Solar collector for forced circulation

- / Kairos XP 2.5-1 has a serpentine absorber that makes it suitable for big systems;
- / The blue selective surface treatment provides very high performances with the 95% absorbtion and only 5% reflection;
- / Kairos XP 2.5-1 offers a very enjoyable design in its category, thanks to the accurate study of the lines, and of the external shape;
- / The new o-ring connection allows a very quick installation, even eliminating the risk to damage the hydraulic connection kit;
- / The special tempered glass with low content iron assures very high protection against the hail, and against the collector's loading;
- / The technopolymer angle, that integrates the condensate exhaust and the flanged manifold outlet, ensures a more precise production process;

HYDRAULIC CONNECTIONS

A: Connecting collectors in parallel with diagonal hydraulic connections

The collectors can be connected in parallel using the joint kit.

A maximum of 6 collectors can be connected in parallel per row.

The inlet and outlet connections of the collector array must be arranged in such a way as to form a diagonal connection (with the inlet at the bottom of one side of the array and the outlet at the top of the other side).

B: Connecting collectors in series

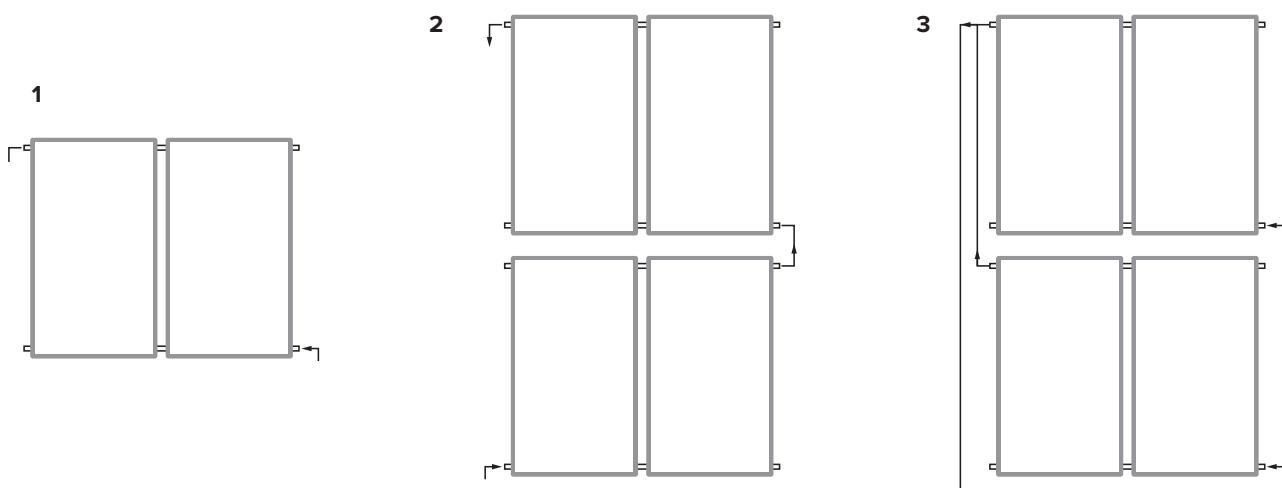

A single collector array may be connected in series to another array.

It is important that the number of collectors is the same in each row in order to avoid differences in flow rate within the arrays.

C: Connecting collector arrays in parallel

A single collector array may be connected in parallel to another array.

It is important that the number of collectors is the same in each row in order to avoid differences in flow rate within the arrays. Hydraulic connection should be carried out according to the principle of reverse return.

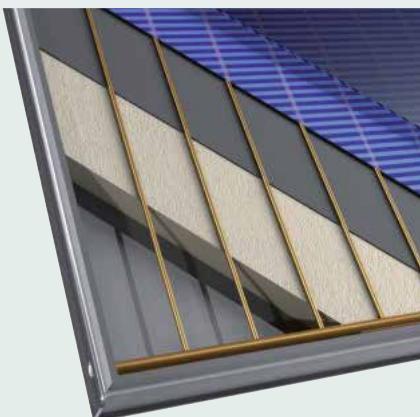

Kairos CF 2.0-1

Solar collector for forced circulation

- / Absorber with highly selective treatment to titanium oxides (95% absorption 5% emission)
- / Hail-proof anti-reflective glass
- / Hydraulic circuit with copper pipes
- / Harp geometry and continuous ultrasound welding
- / Designed and sized for functioning in systems with forced circulation
- / Can be inclined between 30° and 60°
- / Test report according to en 12975

COMPOSITION OF THE ROWS OF SOLAR COLLECTORS

Efficient products for the satisfaction of the user, easiness and flexibility of installation to help the installer: this perfect coupling characterizes our solar collectors and is one of the reason why Ariston's solar products are chosen every year from millions of customer around the world.

The collectors of Ariston solar range can be installed on the ground or flat roof, on sloped roof and in-roof (Kairos XP 2.5-1 V only).

For any of the above mentioned installation possibility, the following tables are designed to help the installer and the end user choosing the correct installation and hydraulic accessories for any kind of solar collector.

Example of ground installation

Example of sloped roof installation

Example of in-roof installation
(only Kairos XP 2.5-1V)

Solar Manager Pro

- / Menu simplified and quick to set-up
- / 7 main schemes and + 20 variants
- / 8 sensor inputs and 5 relay outputs
- / 2 PWM or 0/10V signal to drive up to 2 modulating pumps
- / Up to 2 extension modules via VBus® connectable (21 sensors and 15 relays in total)
- / Irradiation based function to exploit solar energy
- / Possibility to set up by remote or by SD card
- / Measure and report of solar energy exploitation
- / Compatible with ADEME Fond Chaleur (GRS) protocol
- / Complete accessories range for basic and evolved functions

TECHNICAL DATA

SOLAR MANAGER PRO

Inputs	8
Outputs	4 semiconductor relays, 1 potential-free relay, 2 PWM outputs
Power supply	230
Protection type	20
Ambient temperature	0 ÷ 40
Dimensions	198 x 170 x 43

CODE

SOLAR MANAGER PRO

3024252

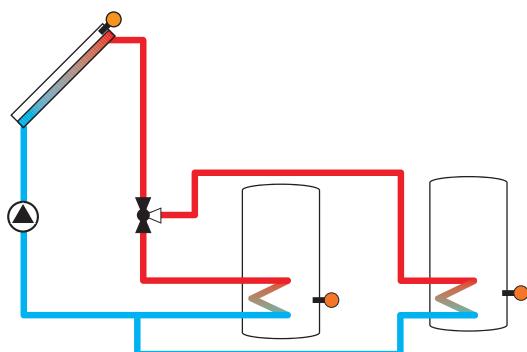

Solar Manager Izy Plus

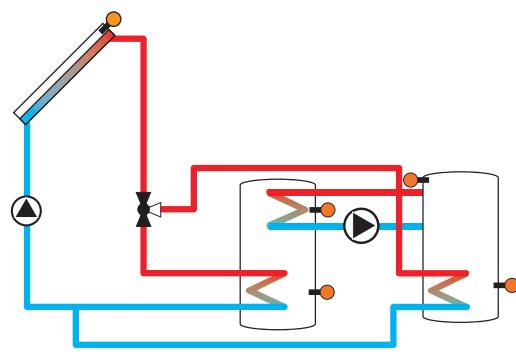

- / Especially designed for the speed control of high efficiency pumps
- / 1 input for a VFD Grundfos Direct SensorTM
- / System Monitoring Display
- / Up to 4 Pt1000 temperature sensors
- / 2 semiconductor relays for pump speed control
- / HE pump control
- / Heat quantity measurement
- / Commissioning menu
- / 10 basic systems to choose from
- / Function control
- / Optional thermal disinfection function
- / Drain back option
- / Unit °F and °C selectable
- / 3 temperature probes Pt1000 (1 collector + 2 cylinder)
- / Wall hung kit

TECHNICAL DATA		SOLAR MANAGER IZY PLUS
Dimensions and minimum distances		
Upper fastening 		
Lower fastening 		
Inputs	4 Pt1000 temperature sensors, 1 VFD Grundfos Direct SensorTM	
Outputs	2 semiconductor relays, 2 PWM outputs	
PWM frequency	512 Hz	
PWM voltage	10.5 V	
Switching capacity	1 (I) A 240 V~ (semiconductor relay)	
Total switching capacity	2 A 240 V~	
Power supply	100 – 240 V~ (50 – 60 Hz)	
Supply connection	type X attachment	
Standby	0.64 W	
Temperature controls class	I	
Energy efficiency [%]	1	
Mode of operation	type 1.C.Y action	
Rated impulse voltage	2.5 kV	
Data interface	VBus® current supply	
VBus® current supply	35 mA	
Functions:	function control, operating hours counter, tube collector function, thermostat function, speed control and heat quantity measurement	
Housing	plastic, PC-ABS and PMMA	
Mounting	wall mounting, mounting into patch panels is possible	
Indication / Display	System-Monitoring-Display for visualisation of systems, 16-segment and 7-segment display, 8 symbols for indication of system status	
Operation	3 buttons	
Ingress protection	IP 20 / EN 60529	
Protection class	I	
Ambient temperature:	0 ... 40 °C	
Pollution degree	2	
Fuse	T2A	
Maximum altitude	2000 m above MSL	
Dimensions	172 x 110 x 46 mm	
CODE		SOLAR MANAGER IZY PLUS

1 three way valve

Solar system with 2 tanks,
1 external heat exchanger and pump control

Solar Manager Pro Accessories

Accessories to manage the solar system	Code	
DATALOGGER DL3 PRO With the DL3 Pro you can easily and conveniently log system data of up to 6 controllers get a comprehensive overview of all controllers connected with the large full graphic display. Transfer data with an SD memory card, or use the LAN interface to view and process data on your PC.	3024276	
DATALOGGER DL2 PRO This module enables the acquisition and storage of large amounts of data (such as measuring and balance values of the solar system) over a long period of time. System access is possible with just a few clicks via VBus.net For transmission of the data stored in the internal memory of the DL2 to a PC, an SD card can be used.	3024277	
I/O EXTENSION MODULE 6-5 PRO The extension Module provides 5 additional relays and 6 additional sensor inputs. Up to 3 extension modules can be connected to the Solar Manager Pro via VBus®. The Extension Modules themselves do not require any adjustments, they are simply connected and assigned to the controller. The inputs and outputs of the registered modules will then be available for all functions of the controller.	3024279	
IRRADIATION SENSOR PRO The solar cell is used for measuring the irradiation intensity. The short-circuit current rises with increasing irradiation intensity. The sensor can also be used for additional functions. The connecting cable can be extended to 100 m.	3024278	
RPD SENSOR PRO Measure the temperature and the relative pressure with a single measuring element and then transmit the measured values directly. They can be optimally used for leakage and overpressure monitoring. Can be used in aggressive media as well as in domestic water and thus are ideal for the application in solar thermal and heating systems.	3024282	
VFD SENSOR PRO SMALL The digital sensor measure the temperature and the flow rate with a single measuring. Can be used in aggressive media as well as in domestic water and thus are ideal for measuring the flow rate and the heat quantity in solar thermal and heating systems. VFD Pro Small has an operative flow range 1-12l / 25-80°C MaxT 100°C (120°C short).	3024280	
VFD SENSOR PRO BIG The digital sensor measure the temperature and the flow rate with a single measuring. Can be used in aggressive media as well as in domestic water and thus are ideal for measuring the flow rate and the heat quantity in solar thermal and heating systems. VFD Pro big has an operative flow range 2-40l/ 25-80°C MaxT 100°C (120°C short).	3024281	
SOLAR MANAGER PROBE - COLLECTOR Probe for collectors, related to PRO electronics	3024273	
SOLAR MANAGER PROBE - CYLINDERS Probe for cylinders, related to PRO electronics	3024274	
SOLAR MANAGER PROBE - CUFT TUBE Probe for PRO electronics, to be applied on the pipes	3024275	
OVERVOLTAGE PROTECTION The device should be used in order to protect the susceptible temperature sensors in or at the collector against induced overvoltages. In the case of local thunderstorms, voltage peaks which could destroy the sensor can be induced in the sensor cable. The protector diodes in the Overvoltage protection limit these overvoltages to a value harmless to the sensor. The best way to protect the sensor is to install this connecting box close to the sensor.	3024284	
LAN INTERFACE - SOLAR MANAGER PRO It is designed for the direct connection of the controller to a PC or router. It enables easy access to the controller via the local network of the owner. Thus, controller access, system parametrisation and data read-out can be effected from every workstation of the network.	3024283	
ALARM MODULE PRO It is to be connected to the VBus® of the controller and issues an optical signal via the red LED if a failure has occurred. It has a potential-free relay output, which can e.g. be connected to a building management system (BMS) to issue a general warning in the case of a system failure.	3024292	

Pump Group Pro 20-70

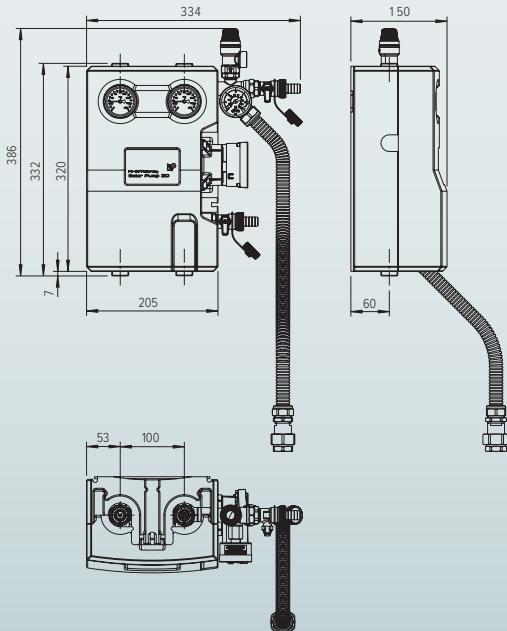

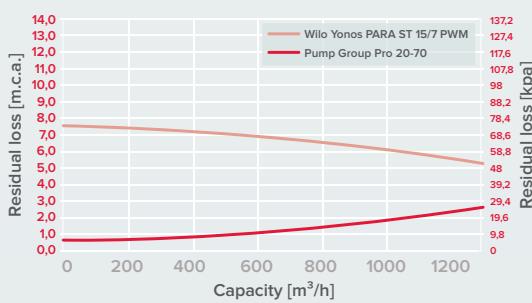

- / Compact size
- / External PPS casing
- / High efficiency pumps

TECHNICAL DATA

PUMP GROUP PRO 20 - 70

Max. admissible pressure	PN 10
Max. operating temperature	120 °C
Max. short-time temperature	160 °C, < 15 minutes
Max. propylene glycol content	50%
Pressure relief valve	6 bars
Pressure gauge	0 - 6 bars
Check valves	2x200 mm wc
Valves and fittings	Brass
Gaskets	EPDM
Check valves	Brass
Insulation	0.041 W/(m K)

Solar system management accessories and devices	Code	
Sensys, modulating system manager (wired) - Remote control of all boiler functions through the BUS Bridgenet protocol - User-Friendly Setting/Configuration of system parameters - thermoregulation - Display of solar system working (if connected) - Display of energy reports (kWh), solar energy production, CO2 savings, storaged DHW - Modulating sensor for detecting of the room temperature - User-friendly daily and weekly scheduling of central heating - User-friendly daily and weekly scheduling of domestic hot water (only in case of only-heating boiler coupled to a tank)	3318585 IT-EN-FR-ES-PT	
	3318613 TK-RUS-GR-HR-SRB	
	3318615 PL-CZ-HU-RO	
SOLAR MANAGER IZY PLUS Especially designed for the speed control of high efficiency pumps, 1 input for a VFD, Grundfos Direct Sensor™, • System Monitoring Display, Up to 4 Pt1000 temperature sensors, 2 semiconductor relays for pump speed control, HE pump control, Heat quantity measurement, Commissioning menu, 10 basic systems to choose from, Function control, Optional thermal disinfection function, Drain back option, Unit °F and °C selectable. STANDARD EQUIPMENT: 3 temperature probes Pt1000 (1 collector + 2 cylinder), Wall hung kit, Manuals IT, EN, FR, ES. Dimensions: 110 x 166 x 47 mm.	3024548	
Additional DHW solar probe Cylinder probe with diameter of 6 mm Pt1000 Class B DIN with 1 metre of blue cable suitable for measuring cylinder temperatures; range -50°C/+110°C. Compatible with Elios 25.	3024274	
Additional collector solar probe Cylinder probe with diameter of 6 mm Pt1000 Class B DIN with 1 metre of grey cable suitable for measuring collector temperatures; range -50°C/+200°C. Compatible with Elios 25. Copper well and probe-holder clamp included.	3024273	
Digital thermostat Device with input for probe and output for the actuation of a high voltage load at 250 V like a diverter valve with 2 or 3 wires. The three digit display allows to view the temperatures and the setting of the functioning parameters. Supplied cylindrical probe with diameter of 6 mm Ptc1000 with 1.5 metres of cable. Dimensions: 79 x 115 x 42 mm.	800232	
Electrical resistance Flanged resistance kit for 1.5 kW single-phase natural circulation systems and 220 V power supply. Includes flange, magnesium anode, thermostat and small cap. Suitable for Kairos Thermo Direct (all versions) and Kairos Thermo HF (all versions).	107069	
Enamelled electrical resistance Flanged resistance kit for 2 kW single-phase natural circulation systems and 220 V power supply. Includes flange, magnesium anode, thermostat and small cap. Suitable for Kairos Thermo Direct (all versions) and Kairos Thermo HF (all versions).	3024272	
Safety group Pre-assembled group including safety valve, automatic air release valve and manometer	12053830	
heating return probe S4	3024175	
EXTENSION PUMP PRO 25-145	3024259	
PIPES KIT EXTENSION PUMP PRO 25	3024260	

Solar Accessories

Hydraulic devices and accessories	Code	
Digital Solar Pump Group Pumping station for forced circulation plants, equipped with a safety, regulation and rinse unit, digital pressure and temperature sensors, electronic control board provided with a collector probe and two tank probes. Hydraulic connections in 18 mm or in 3/4" flat seal version. Dimensions: 275 x 480 mm. flow - return axles distance 125 mm. NB: system interface SENSY to be ordered separately	3318905	
Thermostatic mixer Bronze mixing valve designed for solar application able to supply constant temperature in a wide range of regulations with reaction times at extremely low thermal transients. Equipped with scald-proof mechanism, protection against calcification and corrosion. Dimensions: 115 x 74 mm.	3024085	
GAL EVO motorized mixing valve (plus wires)	3024176	
Motorized diverter valve Diverter valve for DHW integration management. 230 V power supply. Temperature of the fluid +1°C/+95°C, maximum functioning differential pressure 4 bar. 3/4" male threaded connections. Dimensions: 94 x 130 x 68 mm.	3087085	
Motorized three-way valve diverter motorized valve to use exclusively with Macc tank. Suitable with heating and domestic hot water. Includes wires.	3024076	
GAL EVO motorized diverter valve	3024177	
Fresh water station DHW production module. Minimum flow rate 2,5 l/min. Maximum DHW flow rate 32 l/min. Adjustable temperature from 36 to 65 °C. Dimensions 700x400x295 mm	3024152	
Forced circulation sensor kit Compatible with digital solar pump assembly and Sensys. Contains: - solar indirect cylinder sensor - collector sensor	3318485	
Collector sun sensor Compatible with digital solar pump assembly and Sensys. Contains: - collector sensor	3318564

Generic solar plate heat exchanger 16kW Generic solar plate heat exchanger 32kW Generic solar plate heat exchanger 48kW Heat exchanger steel plate brazed, suitable for use with hot water and heating. 5 bar operating pressure, maximum operating temperature 60/45 ° C respectively with exchange surfaces (m2) * / number plates / volumetric flow permissible (l / h) of 0.4 / 18/720; 0.8 / 34/1440; 1.2 / 48/2500	3024036 3024037 3024038	
Solar heat exchanger for swimming pools 20kW Solar heat exchanger for swimming pools 40kW Solar heat exchanger for swimming pools 70kW * Shell and tube heat exchanger in titanium, suitable for heating swimming pool water. Operating pressure 2 bar. operating ranges (m3) primary / secondary respectively of 0.9 / 10; 1.7 / 15; 3/20.	3024039 3024040 3024041	

Solar Accessories

Hydraulics devices and accessories	Code	
Adaptation kit hydraulic manifold side It contains hydraulic fitting elements for smooth copper pipe from 16 to 18 and 22 mm and for connection with flat 3/4 " .	3024070	
Adaptation kit hydraulic pump unit side It contains hydraulic fitting elements for smooth copper pipe from 16 to 18 and 22 mm and for connection with flat 3/4 " .	3024071	
Steel roof passage pipes It contains two flexible stainless steel tubes from 22 mm insulated 1m long. Connections for smooth copper pipe from 16 to 18 and 22 mm.	3087014	
Pre-insulated pipes twins Kit containing 10 m of corrugated stainless steel tube twin 16 mm in diameter and insulated. Collector sensor cable is built. A kit of brass fitting for connection collectors and the pumping station.	3024069	
T-shaped fittings for XP	3024096	
Safety hydraulic group 3/4 "	877085	
Siphon 1"	877086	

Tools for filling and maintenance of the solar system	Code	
Pure antifreeze liquid (5 lt) Propylene glycol non-toxic, odorless and hygroscopic. Corrosion inhibitors contained in the propylene glycol protect the metals normally used in solar installations. Miscible with water in all proportions between 25% and 75%.	800215	
Manual charge pump antifreeze Piston pumps brass for connection to the solar plant during the phase filling and pressurizing.	800235	
GROUP OF FILLING THE SOLAR POWERED Filling of the solar powered device that reduces up to 80% faster start-up of the system. Compact and transportable an indispensable tool for those who frequently install solar systems. Prevalence 40 m, tank capacity 20 liters. Dimensions 390 x 430 x 600 mm	3024091	
Mounting template THERMO HF 150-1 and 200-1 on the ground	3024194	
Mounting template THERMO HF 300-2 ground	3024195	
Carrying handles kettles THERMO HF	3024198	
SOLAR CASE Case containing all the tools specific to the pre-installation inspection, the first startup of the solar system and its maintenance ordinary and extraordinary. The case is composed of: <ul style="list-style-type: none">• A digital pH meter complete with screwdriver and solution (pH 7 @ 25 °C) for calibration• A refractometer full manual screwdriver, plastic dropper and cloth for cleaning of the prism• A digital thermometer with 2 probe Tc-K• Two temperature probes Tc-K Clamp• A pressure gauge 0 .. 4.5 bar• A clinobussola• A pack of maps for the measurement of pH	3024090

Single coil multiposition vertical cylinder

- / Titanium enamelled steel boiler
- / Double electronic anti-corrosion anode in magnesium
- / Recirculation
- / It can be floor and wall mounted even inverted
- / Integrated sensor slot sheath
- / Electrical heating element kit available
- / Wall mounting bracket kit available
- / Can be integrated with the forced circulation solar heating system, electric heating element and boiler

FRONT

REAR

Floor-standing indirect cylinder with mono-coil

- / Tank protection with exclusive titanium-based enamel treatment at 850°C
- / Single-coil, suitable for solar or fossil sources
- / Equipped for recirculation
- / 105 mm front inspection flange
- / Magnesium anode
- / Adjustable support feet
- / 2 kW electrical integration kit or 6 kW (450 L) available on request
- / Two sensor pockets
- / Thermometer included
- / PVC soft jacket included

Maxis CD1

Floor-standing vertical single-coil cylinder for the production of domestic hot water. Integrable with forced circulation solar system or high power heating system

- / Steel boiler with exclusive titanium-based enamel treatment
- / Magnesium anti-corrosion anode
- / Recirculation
- / Inspection flange
- / Integrated probe-housing sheath
- / Available heating element kit
- / Integrated thermometer
- / Flexible removable insulation
- / Active anode available as accessory
- / 400 mm inspection flange
- / Available heating element up to 15 kw on the lateral flange, and up to 6 kW on the cap connection

Buffer cylinder for primary circuit water with coil

- / Black steel cylinder
- / Parallel connections for the solar coil, arrangement for easy connection to the digital solar pump group-internal pipes and arrangement for easy installation on dhw module
- / Possibility of integration with electrical resistance and connection for air release system
- / Designed for integration with Fresh Water Station and Solar Pump Group

Buffer cylinder for primary circuit water, without coil

- / Black steel cylinder
- / 82" connections to manage high power and high capacity sources
- / Ideal to match with plate heat exchangers to storage primary circuit water from solar and other sources
- / Direct connection with the boiler thanks to 6 bar working pressure
- / 8 probe holders (4 immersed and 4 contact probe holders)

Single coil floor-standing cylinder

- / Epoxy Enamelled coating WRAS approved
- / Maximum design pressure of 10 bar, tested at 20 bar
- / Automatic metal welding
- / Removable internal coil
- / Magnesium anti-corrosion anode
- / Soft Polyurethane foam Insulation; 100mm thickness
- / External Jacket options:
 - PVC for standard installation
 - METAL for outdoor installation to protect against weather conditions
- / Drain connection
- / Recirculation connection
- / Inspection and maintenance flanges 508 mm
 - 2 for up to 5000 L
 - 3 for 7000 L
- / Optional heating element kits
 - 3, 12, 24, 36 kW

How to read the symbols

The icons have been designed to facilitate the reading of the features of each product. Ariston makes it possible, from the very beginning, to quickly and easily identify performance levels, understand the different ranges and evaluate purchasing criteria.

In short, users can familiarise themselves with each machine without becoming confused or wasting time, in line with the Ariston philosophy of always offering the customer - and the professional technician - a service which is clear and easy to use.

SUPER SILENT

Silent functioning, respectful of the quiet of your everyday life

ENERGY EFFICIENT

Better exploitation of energy and renewable sources, enhanced performance

ITALIAN DESIGN

The elegant aesthetics is designed in collaboration with Italian designers, an attention to details that dares to be shown off

SYSTEM MANAGEMENT

Manage all Ariston products connected in system thanks to BusBridgeNet® technology

MADE IN EUROPE

Made in Europe

ANTI-CORROSION

Longer durability and high performance thanks to the anti-corrosion Pro-tech technology

EASY INSTALLATION

Installation time and process optimized in cooperation with experts and professionals

SOLAR INTEGRATION

It can be connected in system with Ariston solar-sourced products

MADE IN ITALY

Made in Italy

AG+ COATING

AG+ cartridge technology with antibacterial capability that actively stop the proliferation of E-Coli, Salmonella, Legionella, Mould Fungi & More.

EASY INSPECTION

Large inspection flange for an easier access to the internal components of the products

OUTDOOR INSTALLATION

Designed to be safely installed outside, resistant to all kinds of weather

COMPACT SIZE

Compact design with reduced dimensions for an easy fit at your home

EASY MAINTENANCE

Frontal access to all main components

ECO EVO FUNCTION

Automatic setting of its functioning based on your habits and needs of hot water

ANTI-LEGIONELLA

Automatic water heating cycle to prevent bacterial growth

ANTI-FREEZING

Works at cold temperature

INVERTER TECHNOLOGY

Frequency modulation of the external unit compressor

SOLAR KEYMARK

Compliant with European quality certification for solar systems

ELECTRONIC TEMPERATURE MANAGEMENT

Electronic control panel for easier, more intuitive operation.

TITANIUM PLUS

Longer durability and resistance to corrosion thanks to the Titanium enameling of the water tank

INTEGRATION WITH PHOTOVOLTAIC SYSTEM

Connection with photovoltaic systems

Wi-Fi

Smart Connectivity - Aqua Ariston Net App

WATER PLUS

It keeps the incoming cold water at the bottom of the tank to ensure reduced mixing with stored hot water

ABSOLUTE SAFETY SYSTEM

It is a set of functions preserving the good functioning of the product in case of energy or water failures

INCOLOY ENAMELED HEATING ELEMENT

It is corrosion resistant and reduces limescale

TITAN SHIELD

It is an anti-corrosion and rust-resistant protective technology which prevents the surface from corroding even when it is in contact with warm water

DIGIT DISPLAY

Easy interaction and easy temperature management thanks to the advanced hi-tech digit display

LED DISPLAY

Simple and intuitive multifunction LED display

DOUBLE SAFETY THERMOSTAT

In case of malfunctioning, the precise thermostat blocks heating cycle before reaching too high temperature

HIGH EFFICIENCY INSULATION

Premium and robust environmental-friendly insulation material made up of Cyclopentane

DISPLAY ECO

Frontal led control panel with smart thermometer

SHOWER READY

It shows when enough water has been heated for a shower

i-MEMORY

Function that learns your habits and chooses accordingly the best option between utilizing the renewable energy of the heat pump, and activating the heating element

DRY HEATING ELEMENT

The heating element is not in direct contact with water for long lasting durability and limescale protection

SAFETY PACKAGE

Set of functions preserving the good functioning of the product in case of energy or water failures

HAIL-PROOF

Hail-resistant thick glass

STABLE TEMPERATURE

Outlet temperature remains stable even in the case of flow rate variation

IP25 WATERPROOF

The TOP level in water protection guarantees a safety installation in shower box

CONSTANT TEMPERATURE

Hot water and constant temperature right when you need them, in every condition and regardless of any external factor (water flow, water's original temperature)

SINGLE POINT

It is corrosion resistant and reduces limescale

MULTI POINT

Can supply more water points at the same time (pressurized)

FLAT

Low depth for space saving and easy fitting at your home

ELECTRONIC TEMPERATURE MANAGEMENT

Electronic thermostat ensures an increase of energy saving and prevents scalding thanks to anti-overheating features.

POWER AND TEMPERATURE MANAGEMENT

Flow regulation knob plus temperature regulation knob and 4 steps axial regulation power to set the desired energy consume

MUTIPOSITION

Flexible installation, vertical or horizontal position

PERFORMANCE PLUS

Enhanced performance thanks to the high quality material selection to increase heat absorption and limit heat dispersion

EXTERNAL TEMPERATURE REGULATION

EXTERNAL POWER REGULATION

Easy setting of the temperature/power, thanks to the external controller

After-sales service

First class service

Ariston service model is designed to offer efficiency and professionalism to all its customers.

Genuine Ariston spare parts

All Ariston spare parts are built and tested to guarantee the best possible quality and the reliability of your Ariston product. Using genuine Ariston spare parts and components is the only way to keep your system at its best, fulfilling legal and warranty requirements.

Maximum peace of mind

Ariston gives you the assurance of long-term product quality and safety, and in case of any potential problem it ensures that everything will be dealt with quickly and professionally.
